

Frequently Discussed Questions from March 4 CPAC Meeting

Public facilities

Topics from March 4 CPAC	Potential CPAC questions
<ul style="list-style-type: none"> • Energy – community solar, micro grids, undergrounding powerlines • Water supply - mitigate hard water • Stormwater and wastewater – onsite treatment/pretreatment, catchment, WES capacity • Waste management – local carriers, waste-to-energy • Public broadband 	<ol style="list-style-type: none"> 1. How can Comprehensive Plan policies help enable and promote future adoption of microgrids, community solar, and undergrounding of powerlines? 2. How can Comprehensive Plan policies promote onsite infiltration and pretreatment of stormwater? 3. How can policies support desired services including: <ul style="list-style-type: none"> ▪ Waste-to-energy facilities? ▪ Public broadband? 4. How can policies mitigate impacts from hard water?

Natural resources and environmental quality

Topics from March 4 CPAC	Potential CPAC questions
<ul style="list-style-type: none"> • Air quality – address point-source emissions not effectively regulated by DEQ, idling policy for construction • Pursue multiple goals: solar access, tree canopy, housing density • Prioritize tree preservation in development, street trees • Light pollution • Noise management and mitigation – roads and railways 	<ol style="list-style-type: none"> 1. How can/should we balance and enable potentially conflicting goals for solar access, tree canopy, and housing density? 2. How can policies help reduce and mitigate noise impacts from highways and railroads? 3. How can policies help address impacts from air pollution from point sources and construction? 4. What policies and goals will help reduce light pollution?

For each topic ask: *What are the most important subtopics to solicit further public input for policy development?*
